

ROUGH-BELLIED
BEAN BEAN

- lives in hardwood forests
- feeds on fruit, leaves, insects, small mammals, and eggs; especially fond of flitter beetles and borga beans
- has two broods per year (average number of young per brood is four)
- lives in social groups called palpals
- some species migrate; others stay in the same area year round

ZORGAN

- lives in burrows
- is often found in hilly and mountainous areas north of the equator
- feeds on camcams, miras, and other fruits
- mates for life
- can have two or three broods per year, but usually has one; often gives birth to twins, but one of the twins usually dies
- is noted for its beautiful blue fur

CRESTED CRABBIT

- is noted for its shiny purple crest feathers
- lays two eggs every other year
- feeds on white-backed sand crabs
- huge flocks gather during the mating season
- nests in rough-barked pine trees along the coast of a tiny island

- migrates each winter to a tropical island near the equator

GREEN GOOR

- lives in streams and marshes
- feeds on fish, eggs, tadpoles, and aquatic insects; especially fond of mosquito larvae
- hibernates in clusters in the mud during cold months
- lays an average of five eggs each year; eggs are sensitive to pesticide poisoning
- has been introduced into other areas to help control mosquitoes
