

GETTING READY FOR SPRING?? CHECKED YOUR WELL WATER LATELY??

Annual well water testing for bacteria and nitrate is recommended especially during the springtime when groundwater levels are at their highest. If you are a Story county resident using a private well water source, you are eligible under our grant program to have your water tested for bacteria and nitrate **for FREE.**

Why test? Because the taste, smell, or visual appearance of your well water will not necessarily allow you to detect contaminants. Having your well water tested is the smart thing to do to protect the health of you and your family!

Contact the Environmental Health Department at Healthweb@storycounty.gov or **515.382.7240** to set up a test today.
